SUMMARY

INTRODUCTION

Bias refers to prejudiced attitudes or decisions that favor or disadvantage individuals or groups based on characteristics such as:

- Gender
- Race or Ethnicity
- Age
- Disability
- Socioeconomic Background

PROBLEM

In a workplace, biases can occur during:

- Hiring and Recruitment
- Promotions and Career Growth
- Day-to-Day Interactions

Biasness can lead to:

- loss of talent
- decreased productivity
- missed opportunity

SOLUTION

- A browser extension that will read through emails and rate the bias level based on predefined metrics.
- It will then give the rephrased version with those statements omitted that should not be used in the email.

HOW IT WORKS

Step1: User installs the bias-detecting extension

Step2: The extension analyses the texts, data and language used based on the prompt provided.

Step3: It then provides suggestions to replace or omit biased phrases.

POSTMAN API

SUMMARY

- It provides suggestions to change any biased phrases entered in your draft, and additionally a rephrased version to refer.
- Also, if we had access to resources that are currently restricted to those who pay for them, we would try to integrate it to enhance the output.
